

# Corner Cottage

## Arrival

### Keys

The house keys are in the key safe on the front door. I will give you the number, but please ensure you replace them when you leave. There are spare keys available in the house in case of emergency and there are local contacts with keys who can rescue you if essential. If you have an issue getting in the house, please contact me immediately.

### Beds

Beds should be made and towels provided. Various miscellaneous towels, tea towels, bathmats, etc can be found in the airing cupboard in the bathroom.

### HiFi, TV and Broadband

Behind the television you will find a socket which powers WiFi, TV, HiFi, broadband, etc. It should be left switched on, but if it is not already you need to switch it on. Connect to WiFi using SSID: **CornerCottage** and Password: **CCPolruan**. Please do not switch this socket off, but please make sure the TV, DVD player and HiFi are switched off when not in use. TV, Blu Ray player and various streaming services, including Netflix, Prime, BBC iPlayer, All4, etc are available on the TV with unlimited broadband.

### Water

You are likely to need to switch on the mains water. The main stop cock is under the sink in the back of the basement. Hot water is provided via an immersion heater controlled by a timer in the kitchen. It is normally programmed to come on 06:00 and go off at 10:00. It is then switched again at 18:00, going off at 20:00 to provide hot water in the evening. Unless there has been a guest immediately before you, you should find the timer switched off on arrival, so to switch it on press the ADVANCE button once. It will then operate according to the programmed times. If you need hot water urgently you can use the WATER HEATER BOOST switch which should provide enough hot water within about 30 minutes. Please make sure you switch it off after use though.

### Heated Towel Rail

The heated towel rail in the shower room is on a similar timer to that used in the kitchen. Again, if no one has been in the house immediately before you will need to turn on as above by pressing the ADVANCE button once. It is programmed to come on at 02:00 and off at 10:00. In addition, ensure the controller at the bottom left-hand corner of the towel rail is set to full.

If you need to use the heating, please consult the web page for the house (Information/House Details). Here you can also access various manuals for appliances etc.

Help yourself to anything you need, but please replace anything you use. Please also report any problems to me. If you are a big party, there is a large fridge in the basement if you need more cooling space.

Please follow details when leaving ready for the next visitors.

Enjoy your stay.
